Foundations of mathematics is the study of the philosophical and logical and/or algorithmic basis of mathematics, or, in a broader sense, the mathematical investigation of what underlies the philosophical theories concerning the nature of mathematics. In this latter sense, the distinction between foundations of mathematics and philosophy of mathematics turns out to be quite vague.

Paul Anthony Samuelson (May 15, 1915 – December 13, 2009) was an American economist. The first American to win the Nobel Memorial Prize in Economic Sciences, the Swedish Royal Academies stated, when awarding the prize in 1970, that he "has done more than any other contemporary economist to raise the level of scientific analysis in economic theory". ...

Paul Samuelson - Wikipedia

The Bible, in and of itself, is a miracle. Think about it — over centuries of time, God supernaturally moved upon a number of men's hearts, resulting in them writing down the exact words of God. God then led His people to recognize these divine writings and to distinguish them from everything else that has ever been written. Then God's people brought these 66 books together.
