Teaching Pendant Specifications

A teach pendant device is needed to control an industrial robot remotely. The device allows its controller to work with robots without the need for tethering to a fixed terminal. Teach pendants offer a variety of settings to control robots and are also utilized to design new capabilities and features. Within the robotics repair industry, technicians not only repair the units themselves but use the device to test robotic equipment.

What are teach pendants? - ICR Services

The teach pendant can be controlled both by button and touch. It features friendly interface, innovative interactive programming and secondary development available for users. The device also offers kinematic algorithms of various mechanical structures, which are suitable for various applications. Teach Pendant Hardware Specifications
