'Growth for the sake of growth' remains the credo of all governments and international institutions, including the European Commission. Economic growth is presented as the panacea that can solve any of the world's problems: poverty, inequality, sustainability, you name it. Left-wing and right-wing policies only differ on how to achieve it.

Why economic growth is not compatible with environmental ...

Technology built the world's great cities. As Lewis Mumford chronicled in his 1961 opus, *The City in History*, technology played the central role in expanding the metropolis, beginning in the Middle Ages and accelerating with the Industrial Revolution. Technology's net effect, Mumford wrote, "brought an endless flow of distant foods and raw materials into the metropolis, along with workers ...

Technology and the City | City Journal

"Above all, China's economic growth is strongly powered by cheap coal. The same holds true for India, South Africa, as well as some Eastern European countries," he added.

Economic growth vs. environmental protection ...

The correct answer is C. The city's location The passage explains how important trade was for the city because of the rivers and the swamps. Ships from Europe or other parts of the world could enter the US and enter the Louisiana ports and then the goods could be taken to other parts of the United States from there.
