Here is an updated version of the \$domain website which many of our East European book trade customers have been using for some time now, more or less regularly. We have just introduced certain upgrades and changes which should be interesting for you. Please remember that our website does not replace publisher websites, there would be no point in duplicating the information. Our idea is to present you with tools that might be useful in your work with individual, institutional and corporate customers. Many of the features have been introduced at specific requests from some of you. Others are still at preparatory stage and will be implemented soon.

Vbscript User Guide

What is VBScript? Introduction & Examples

Functions contain instructions that describe the required calculations. Variables save the values used or created during those calculations. A script must contain a studyor strategyannotation which defines the script's name and other properties. The script's body contains the functions and variables necessary to calculate results which will be rendered on a chart with a plotfunction, or some other function that plots the script's output.
